INTERNSHIP GAME DEVELOPER

Undergraduate student majoring in **Game Development** I am currently seeking every summer internship opportunity as a Game Developer, to gain real-world experience and further develop my skills. I have hands-on experience working with Unity and version control using Git, and previously completed almost 2-month remote internship related to game development.

STRENGTHS AND EXPERTISE

program language : C#, Html, CSS, JavaScript, NodeJS & SQL

version control & GUI : Git, GitHub , Gitlab & Sourcetree

Tools : Unity, Maya, Visual Code, Antigravity, Figma

WORK EXPERIENCE

Core Polygon Limited

June 2025 - July 2025

Unity Developer | Internship | Remote

1 month 26 days

I worked remotely, using Git to collaborate with the team to develop two interactive games. I strengthened my C# skills, learned many techniques including MVC, Lazy update , Design pattern and gained hands-on experience with teamwork. I worked closely with game designers, frequently discussing and refining ideas to align design and implementation.

PROJECTS

Dimension hero

September - December 2025

Unity 3D Game

Served as Lead Programmer in a team project using Git for version control. Implemented design patterns, lazy update optimization, and MVC architecture for player skills and character systems. Developed Dynamic UI Instantiation with prefabs to reduce scene changes and prevent Git merge conflicts.

The Void's Harvest

August – September 2025

HDRP Project

I sculpted and created at least two original 3D models, I applied advanced lighting techniques and rendering workflows to enhance visual fidelity, specifically utilizing : Post Processing, Screen Space Ambient Occlusion, Light Baking, Reflection Probe, Fog & Volumetric Lighting.

Sweetdream

March - May 2025

Unity 2D Project + Unity Ads Monezation

Designed game mechanics for a mobile game. Developed a playable prototype showcasing the core gameplay and features, applying techniques such as Tilemap, animation, UI, and post-processing.

Project our Stronghold

March – May 2025

Unity 3D Game

First experience working in a team environment, where I was responsible for designing character abilities including 3 skills, 1 passive and normal attack. Developed SkillController system and all Player abilities by implementing them primarily using List and Dictionary data structures.

EDUCATION

King Mongkut's University of Technology Thonburi

2023 - Present

Technology Media | **Game Development** | GPAX : 3.32
