PROFILE INFO

Undergraduate student majoring in Media Technology I am currently seeking a summer internship opportunity as a Game Developer, to gain real-world experience and further develop my skills. I have hands-on experience working with Unity (C#) and version control using Git, and previously completed a 2-month remote internship related to game development. That experience strengthened my understanding of teamwork, and the game development pipeline.

EXPERIENCE

- **Core Polygon Limited** **June - July 2025**
Unity Developer | Remote
 - Developed gameplay systems, mechanics, and core game logic for two interactive games.
 - I had learn architecture patterns and optimization techniques, including MVC, Lazy GameObject Instantiation, and UI Virtualization, to improve performance and maintainability.

PROJECTS

- **18 March 2025 - 30 May 2025**
Unity 2D Project + Unity Ads Monezation
SweetDream
 - Developed game design and game prototype with Unity.
 - Part of Game Design Documents : Responsible for designing game mechanics for a mobile game with the objective of making the gameplay engaging and distinctive.
 - Part of Game Prototype : Developed a prototype to demonstrate the core gameplay and created a new application on the Google Play Console.
 - Monetize My App with Unity Ads
- **22 March 2025 - 10 May 2025**
Unity 3D Project
Protect our Stronghold
 - Designed game mechanics for a Windows PC game in collaboration with a development team. I was responsible for character skill design, working closely with the teammate in charge of enemy behavior to ensure appropriate enemy responses to each skill.
